

7 August 1957

Dear Dan:

Attached hereto is letter from Burt with Exhibits A, B, C, D and E which are recommended increases in the FAK's, Depot Spares and SLOE Equipment for Systems I and III. These lists have been reviewed by B. Denard and others and approval has been granted as indicated in Bill's letters which are also attached.

Accordingly, it is requested that you authorize Burt to proceed with the manufacture and procurement of the items as approved by the above mentioned letters. An amendment to A-101 will be necessary to reflect the increased quantities, therefore Bob S. should prepare a proposal as soon as possible. Since these are the only copies of the list, as marked up, available to this office, would you please ask Bob to return them to us as soon as he has obtained all the information he requires?

Very truly yours,

25X1
